

GRIZZLY TAPE®

SCARY STRONG, EXTREMELY DURABLE AND WEATHER RESISTANT
PE EXTRUDED TAPE

TECHNICAL PROPERTIES

Water resistance: Very good

Temperature resistance: -30°C - +60°C (up to +80°C short periods)

UV resistance: Very good

TECHNICAL SPECIFICATIONS

Appearance: Tape

Chemical base: PE extruded, with polyester/cotton weaving

Colour: Silver

Thickness: approx. 0.3 mm

Specifications: The extrusion technology causes extremely high intrinsic strength and prevents delamination. The extra thick quality ensures a lasting and smooth result.

STORAGE CONDITIONS

Store in tightly closed packaging in a dry, cool and frost-free place.

PRODUCT DESCRIPTION

Scary strong, extremely durable and weather resistant PE extruded cloth tape. This cloth tape can be easily torn by hand in both directions.

FIELD OF APPLICATION

Suitable for waterproof repairing, fixing, strengthening and connecting all kind of jobs indoors and outdoors, in all weather conditions. Extremely durable especially for outdoor applications.

PROPERTIES

- Scary strong (high tensile strength)
- For durable applications
- Weather, temperature and UV resistant
- Waterproof
- Can be easily torn off manually
- Smooth result
- Extra thick
- Clean removability

PREPARATION

Surface requirements: The surface must be dry, clean and free of dust and grease.

APPLICATION

Directions for use:

Stick and press well the tape onto the object without touching the adhesive as this reduces the adhesive strength.

Stains/residue: Remove possible tape residue with white spirit.
